1. Claims 1-29 remain for examination.
2. The abstract of the disclosure is objected to because the current abstract does not reflect the inventive feature of the claimed invention to distinguish over the prior art. Correction is required. See MPEP § 608.01(b).

6. Claims 1-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Margolus et al, U.S. Patent No. 5,159,690, cited in the previous office action.

The rejection is respectfully maintained for the reason set forth in the previous office action incorporated herein by reference and for the reason that "various components being integrated on a single chip" does not provide a patentable distinction.

4. Applicant's arguments filed October 21, 2004 have been fully considered but they are not persuasive.

Applicant argued that the reference does not teach integration on a single chip of the memory, update engine, cellular automaton update unit and an execution unit to execute microprocessor instructions.

Examiner believes that "integration on a single chip" no longer provides a patentable distinction. The processors in the reference clearly execute microprocessor instructions, since processors operate by executing instructions.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2111

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
